3.) NEW!

ID 6633, URAL.5.COPPIA.SIG, 2in2 slip on exhaust system, stainless
DP EUR 380,--
recommended retail price w/o tax/es EUR 500,--

This exhaust system is manufactured by GPR. This set consists 2 silencers (stainless steel) and clamps at the front and rear and is installed after the original catalytic converter. It fits all models. The tube diameter is 36 mm inside. It therefore also fits on manifolds of older models. For the younger models with a manifold diameter of 35 mm, we include 2 seals for each system (ID 5035, VIC21). Unfortunately, this reduction 35/36 is currently not in stock and is expected to arrive back from Italy in early June.

For the Retro model, an intermediate pipe would have to be installed between the catalytic converter and the silencer. The parts weigh 4 kg net. There is a decibel killer built into the back that can be removed. Even with the decibel killer, the system has a very powerful sound. A test certificate is included or the exhaust system has an E-mark in the silencers. So the exhaust system is legal.

This exhaust system replaces the Italian exhaust systems VIC10 / ST (stainless) and VIC10 / CR (chrome), we can no longer offer these two exhaust systems.

ID 6634, URAL.5.COPPIA.SIG.BLK, 2in2 slip on exhaust system, black
DP EUR 400,--
recommended retail price w/o tax/es EUR 550,--

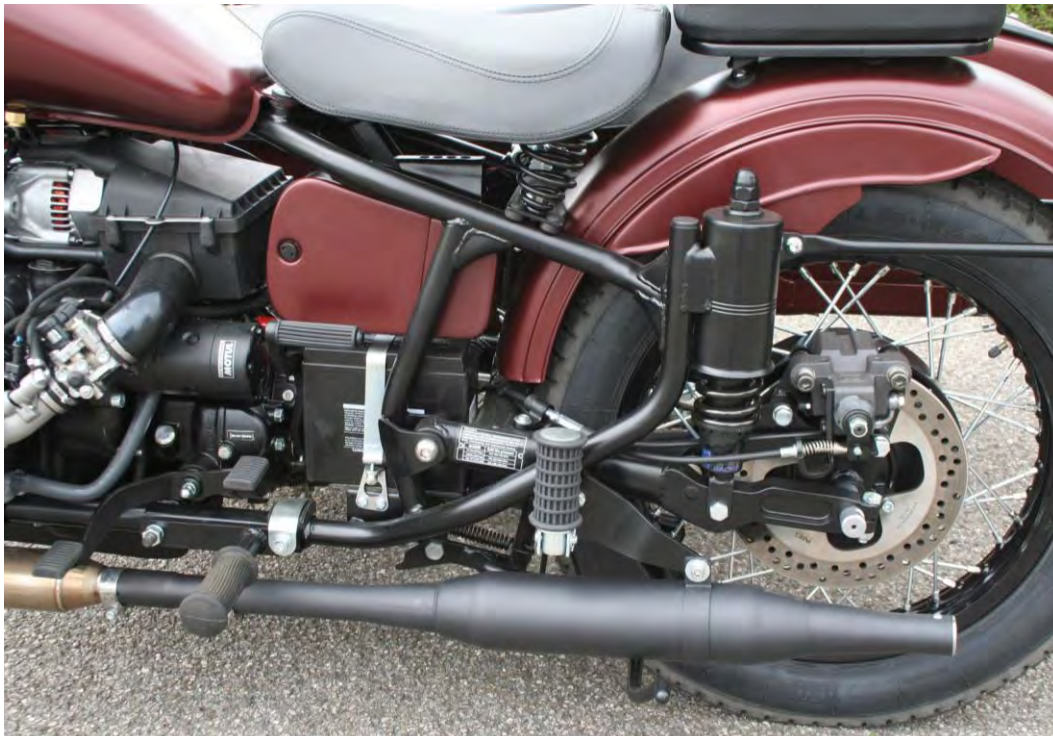

As above ID 6633, but coated with black ceramic. The large exhaust clamps are also black.

This exhaust system replaces the Italian exhaust systems VIC10 / BL (black).
We still have 25 sets of VIC10 / BL, ID 5036 in stock. After the sale of our inventory, we will no longer have this system available, the new ID 6634 in the future.
